In the Specification:

Please replace the paragraph beginning at page 4, line 23 with the following amended paragraph:

Shown in Fig. 1 is a circular saw blade 10 (work implement) mounted on a table saw 12 having a table top 14 and a power driven rotatable shaft 16. Rotatable shaft 16 includes an annular flange ~~[[13]]~~ 18 and a threaded connector 20. Blade 10 is located immediately adjacent annular flange 18, and a stabilizing washer adapted to be received on threaded end portion 20 of rotatable shaft 16 is located immediately adjacent blade 10. Fastener nut 22 is tightened onto threaded end portion 20 of shaft 16 to securely retain blade 10 and a one-piece stabilizing washer 24 between annular flange 18 and nut 22.
